CLARIFICATION REGARDING DTSC JULY 20, 2017 LETTER ON FINAL BASELINE AIR MONITORING WORK PLAN AND RESPONSE TO COMMENTS FOR THE SANTA SUSANA FIELD LABORATORY, VENTURA COUNTY, CALIFORNIA

Dear Messrs. Zorba, Zeller and Jones:

The Department of Toxic Substances Control (DTSC) would like to clarify comments made in our July 20, 2017 letter regarding review of the *Final Baseline Air Monitoring Work Plan (Work Plan) for the Santa Susana Field Laboratory* (SSFL) and responses to DTSC Comments.

DTSC is requiring monitoring of particulate matter less than 10 microns in aerodynamic diameter (PM10) at all stations proposed in the June 2017 Work Plan. In addition, DTSC is requiring monitoring of particulate matter less than 2.5 microns in aerodynamic diameter (PM2.5) at a minimum of three stations where PM10 is being monitored. The PM2.5 sampling is to evaluate baseline conditions for PM2.5 in the predominant wind directions.

Printed on Recycled Paper

DTSC proposes the following stations be monitored for PM2.5: NASA-2, Boeing-1, and Boeing-4. The responsible parties should notify DTSC if they plan to propose a different set of three locations prior to resubmitting the Final Work Plan for DTSC approval.

If you have any questions regarding this letter, please contact Ms. Julie Lincoln at Julie.Lincoln@dtsc.ca.gov, or at (916) 255-3684.

Sincerely,

Mark Malinowski, Chief
Santa Susana Field Laboratory and Northern California Schools Branch
Department of Toxic Substances Control
